Subject: Update: Corps record on Saltworks site

Spoke with Jane Hicks just now asking for their response to last week's written request. They haven't started on compiling the record. She said any list of documents that we could potentially view would first need to be OK'ed by Corps HQ, so she offered to simply send us what's releasable. She said she would try to do the District's part in that process by end of this week. I said this would be greatly appreciated, and that depending on what they send, could just be an interim solution.

Who knows how long this might take. I suggest we move ahead with next steps of getting closure on HQ supplementary support, having LIDAR flown, and contacting Cargill for site access.
